Research Summary

Amorphous metal cores are magnetic cores made from alloy materials that have no long-range ordered atomic structure, unlike traditional metal cores. They have unique magnetic properties, including low coercivity, low core loss, and high permeability, making them ideal for use in power electronics, transformers, and other high-performance applications. As a result of these properties, amorphous metal cores are known to be highly efficient and quieter than traditional metal cores. They are also more environmentally friendly as they are made from recyclable materials.

The major global manufacturers of Amorphous Metal Cores include Hitachi, Advanced Technology, Zhixin Electric, Zhaojing Incorporated, Qingdao Yunlu, Foshan Catech, ENPAY, Mangal, Kotsons, UAML, TI-Electronic, etc. The global players competition landscape in this report is divided into three tiers.
