Research Summary

Annular cutters are specialized cutting tools designed for drilling larger holes in harder materials such as metals, alloys, and other tough materials. They are also commonly referred to as mag drills, core drills, hole cutters, or slugger cutters. These cutters are aptly named for their annulus shape, which is a hollow cylinder with teeth on the outer circumference. They work by removing a ring-shaped portion of the material and leaving a cylindrical core or slug in the center of the hole. Annular cutters can be used with magnetic drill or drill press machines for both wet and dry cutting applications. They are available in various sizes, materials, and tooth designs to suit different drilling requirements.

The major global manufacturers of Annular Cutters include Hougen, Milwaukee, Nitto Kohki, Fein, BDS, Ruko, EVOLUTION, Zhejiang Xinxing Tools, DEWALT, Euroboor, CHAMPION, ALFRA, KARNASCH, Powerbor, Lalson, etc. The global players competition landscape in this report is divided into three tiers.
