Research Summary

Aseptic carton packaging lines are specialized production systems designed to package liquid and semi-liquid food products, such as milk, juices, soups, and dairy alternatives, in sterile, shelf-stable cartons without the need for refrigeration. These lines integrate sterilization, filling, and sealing processes in a controlled, contamination-free environment to ensure product safety and longevity. The packaging materials, typically multi-layered cartons, are pre-sterilized and formed within the system, while the product itself undergoes ultra-high temperature (UHT) treatment to eliminate harmful microorganisms.
