Research Summary

An auto-retractable safety syringe is a medical device that automatically retracts the needle into the syringe barrel after use. This feature prevents accidental needlestick injuries and exposure to blood-borne pathogens. Auto-retractable safety syringes come in various designs and are used in medical settings such as hospitals, clinics, and doctor's offices. The use of the auto-retractable safety syringe is especially important in environments where there is a higher risk of needlestick injuries, such as in emergency departments, where there is a higher likelihood of encountering patients with unknown infectious diseases.
