Research Summary

Automated test equipment (ATE) is a computer-controlled device that is used to perform automated tests on electronic systems or devices. ATE is designed to check the functionality and performance of electronic components and circuit boards through a series of tests that simulate real-world conditions. ATE is commonly used by manufacturers of electronic products in order to improve their production efficiency and product quality. With the use of ATE, it is possible to test a large number of products in a short amount of time, and to detect any issues or defects early in the testing process. ATE can also help to reduce the overall cost of testing by improving the accuracy and efficiency of the testing process.

The major global manufacturers of Automated Test Equipment (ATE) include Teradyne, Advantest, LTX-Credence, Cohu, Chroma, SPEA, Avera, Shibasoku, ChangChuan, Macrotest, Huafeng, PowerTECH SEMI, etc. The global players competition landscape in this report is divided into three tiers.
