Research Summary

Automatic knife gate valves are a type of valve that is designed to quickly and efficiently control the flow of liquids or gases. They are similar to traditional gate valves, but instead of using a circular disc to block or allow the flow of liquid/gas, they use a horizontal or vertical blade that is controlled by an actuator. When the valve is opened, the blade is moved out of the way, allowing the medium to flow through the pipe. When the valve is closed, the blade is moved to block the flow. These valves are often used for applications where quick shut-off is required, such as in water treatment facilities, pulp and paper mills, food processing plants, and mining operations.

The major global manufacturers of Automatic Knife Gate Valves include Orbinox, DeZURIK, Flowrox, Bray International, SISTAG (WEY Valve), VAG, Stafsj?
