Research Summary

Automatic License Plate Recognition (ALPR/ANPR) Cameras are surveillance devices that use optical character recognition (OCR) technology to automatically identify and read license plates on vehicles. These cameras are typically mounted on police cars, toll booths, parking lots, and other areas where vehicles pass by. The cameras record the license plate number and time, date, and location of the vehicle. The data is then processed and matched against databases of stolen or wanted vehicles or drivers with outstanding warrants. The technology is also used for traffic enforcement, parking enforcement, and border security.
