Research Summary

Automatic Transfer Switches (ATS) are devices used in electrical systems to automatically switch the load between two power sources in the event of a power failure or other electrical problem. They are commonly used in emergency backup power systems, such as generators or battery systems, to ensure that the power to equipment is not interrupted. ATS work by monitoring the power supply from the main utility power source and automatically switching to the backup power source if the main power supply fails. This ensures that critical equipment, such as data centers and hospitals, remain operational even during power outages. ATS are commonly used in commercial and industrial applications, but can also be found in residential home backup generators.

The major global manufacturers of Automatic Transfer Switches include GE, Eaton, Cummins, KOHLER, ABB, Briggs & Stratton, Vertiv, Thomson Power Systems, GENERAC, Socomec, etc. The global players competition landscape in this report is divided into three tiers.
