Research Summary

Automatic transmission (AT) is a type of transmission system used in vehicles that allows for automatic gear changes without the need for manual shifting. It operates using a hydraulic system that controls the application of power to different gears and uses a torque converter to transfer power from the engine to the transmission. In an automatic transmission system, the driver simply selects the mode of operation and the transmission takes care of the rest. This type of transmission is widely used in modern vehicles due to its convenience, ease of use, and efficiency.
