Research Summary

Automotive Air Conditioning Electric Scroll Compressors are a type of compressor used in air conditioning systems in vehicles. They are electrically driven compressors that use rotating scroll-like parts to compress the refrigerant gas and move it through the system. The scroll parts work together to trap and compress the refrigerant, and then move it to another part of the system. Electric scroll compressors are known for their efficiency, reliability, and improved performance compared to other types of compressors. They are commonly used in hybrid and electric vehicles as they use the vehicle's electric power supply instead of a conventional engine-driven belt.
