Research Summary

Automotive airbag fabric is a specialized type of textile material used to make airbags in vehicles. It is designed to be strong, lightweight, and able to withstand high levels of stress and impact. The fabric is often made from a combination of materials such as nylon, polyester, and Kevlar to provide maximum strength and durability. The airbag is deployed when a sensor detects a sudden impact, and the fabric rapidly inflates, cushioning the occupants of the vehicle from impact and reducing the risk of injury or death.
