Research Summary

An automotive blade fuse is a type of electrical fuse commonly used in automobiles and other vehicles. It is a small, rectangular-shaped device made of plastic and metal that is designed to protect the electrical system of the vehicle from damage caused by an overload or short circuit. The blade fuse has two prongs that fit into a fuse holder, which is usually located in the engine compartment or under the dashboard of the vehicle. When the electrical current reaches a predetermined level, the blade fuse will melt and break the circuit, preventing further damage to the vehicle's electrical system. Blade fuses are available in different amperage ratings to suit the electrical requirements of various automotive devices such as headlights, radios, and windshield wipers.

The major global manufacturers of Automotive Blade Fuse include Littlefuse, Pacific Engineering Corporation (PEC), Eaton (Cooper Industries), MTA SpA, ESKA Erich Schweizer, Conquer Electronics, Tianrui Electronic, Zhenhui Electronics, Dongguan Andu Electronic, Selittel, Zhejiang Worldsea Autoparts, etc. The global players competition landscape in this report is divided into three tiers.
