Research Summary

An Automotive Camera Cleaning System is a device that is installed in a car to clean the cameras used in the driver assistance system. These cameras are usually located in the front, back, and sides of the car. The system is automatic and works by spraying a cleaning solution onto the camera lens and then blowing it dry with air. It is designed to remove dust, dirt, and other debris that can accumulate on the camera lens, which can cause distortion or even block the camera's view. The Automotive Camera Cleaning System is especially helpful during bad weather conditions such as rain, snow, or fog, when the cameras may become dirty more quickly.
