Research Summary

Automotive electric actuators are devices that convert electrical energy into mechanical motion. They are commonly used in automobiles to control various engine and transmission components, including throttle valves, turbochargers, exhaust gas recirculation (EGR) valves, and more. These actuators use electric motors or solenoids to actuate a mechanical component, allowing for precise and efficient control of the vehicle's systems. They are often more reliable and durable than their pneumatic or hydraulic counterparts, and can be easily integrated into electronic control systems.

The major global manufacturers of Automotive Electric Actuators include Bosch, Denso, Delphi, Magna, Continental, Valeo, Magneti Marelli, Hella, Hitachi, Mahle, etc. The global players competition landscape in this report is divided into three tiers.
