### Research Summary

Automotive racing tires refer to specialized tires used in motor racing, specifically designed for high-speed performance and cornering ability. These tires are made from a soft and sticky rubber compound, which provides greater grip and traction on the road surface. They also have special tread patterns that optimize grip during acceleration and braking. The design of racing tires varies depending on the racing discipline, whether it's circuit racing, drag racing, rally racing, or off-road racing. They are also designed for different weather and track conditions, including wet, dry, or intermediate. Racing teams spend a lot of time and money testing and selecting the right set of tires that will provide them with the best possible performance during a race.

The major global manufacturers of Automotive Racing Tires include Pirelli, Goodyear, Hankook Tire, Michelin, Yokohama, Bridgestone, etc. The global players competition landscape in this report is divided into three tiers.
