### Research Summary

An automotive rubber seal is a specialized type of rubber material used to seal various components and systems in a vehicle. These seals are designed to prevent the escape of air, fluids, or other elements from one part of the vehicle to another. They are typically made from a variety of materials including natural rubber, synthetic rubber, and silicone rubber and are used for applications such as sealing doors, windows, and engine components. Automotive rubber seals are also designed to resist extreme temperatures, chemicals, and abrasion to ensure long-lasting performance and reliability.
