Research Summary

Ball Jars, Mason Jars, and Hermetic Jars are types of glass jars commonly used for preserving and canning food items. Ball Jars are a brand of glass canning jars that were first introduced in 1884 by the Ball brothers. These jars are popular for their durability and airtight seal, making them ideal for long-term storage of dry goods or preserved foods. Mason Jars are a type of Ball Jar that has become synonymous with canning and preserving food. They were first invented by John Landis Mason in 1858 and are characterized by their two-part lid consisting of a flat disc and a threaded ring. Mason jars are also commonly used for drinking glasses, candle holders, and other DIY projects. Hermetic Jars feature a rubber, cork, or plastic seal around the lid to create an airtight seal to keep contents fresh. These jars are similar to Ball and Mason Jars but are commonly used for storing liquids such as oils, vinegars, and syrups. They are also great for storing herbs and spices.
