Research Summary

Bamboo charcoal powder is a finely ground form of charcoal derived from bamboo plants. It is produced through a process of heating bamboo at high temperatures in the absence of oxygen, resulting in the carbonization of the bamboo fibers and the creation of charcoal. Bamboo charcoal powder is known for its porous structure, which gives it excellent adsorption properties. It is often used in various applications, including skincare products, water purification systems, air purifiers, and dietary supplements. In skincare, bamboo charcoal powder is prized for its ability to draw out impurities, toxins, and excess oils from the skin, making it a popular ingredient in cleansers, masks, and exfoliators. Additionally, it is used in oral care products like toothpaste and mouthwash for its odor-absorbing and whitening properties. In water and air purification, bamboo charcoal powder is utilized to remove pollutants, odors, and harmful chemicals due to its porous nature, which enables it to trap and filter out contaminants effectively.
