Research Summary

Behentrimonium chloride is a quaternary ammonium compound commonly used in the cosmetic and personal care industry, particularly in hair care products. It acts as a conditioning agent and surfactant, providing benefits such as detangling, smoothing, and softening of the hair. Behentrimonium chloride has positive charged ions that help it adhere to the negatively charged hair strands, reducing friction and making the hair easier to comb and manage. It also helps to reduce static electricity and enhance the overall appearance and feel of the hair. Additionally, behentrimonium chloride has some antimicrobial properties, which can contribute to the preservation of cosmetic formulations. Due to its conditioning properties, it is commonly found in products such as conditioners, leave-in treatments, hair masks, and hair styling products. It is considered a safe ingredient when used within recommended concentrations and guidelines.

The major global manufacturers of Behentrimonium Chloride include Clariant, Evonik Industries, KCI Limited, Thor Personal Care, Solvay, Croda International, KAO
