Research Summary

Behentrimonium methosulfate is a quaternary ammonium compound used primarily in hair care products as a conditioning agent. Despite its name, it is not a sulfate but rather a gentle, non-irritating surfactant. Behentrimonium methosulfate is derived from natural sources, such as rapeseed oil, and is known for its excellent detangling, softening, and smoothing properties. It helps to reduce friction between hair strands, making combing and styling easier while leaving the hair feeling smooth and manageable. Unlike harsher sulfates, behentrimonium methosulfate is considered a mild and gentle ingredient that does not strip the hair of its natural oils or cause dryness. It is commonly found in a range of hair care products, including conditioners, leave-in treatments, hair masks, and styling products, to improve the overall texture, appearance, and manageability of the hair.

The major global manufacturers of Behentrimonium Methosulfate include Clariant, Croda, Evonik Industries, Global Seven, KCI Ltd, Koster Keunen, Miwon Commercial, Solvay, Mapric, AQIA, Sino Lion, etc. The global players competition landscape in this
