### Research Summary

Bio-based isododecane is a sustainable, plant-derived alternative to traditional petroleum-based isododecane, a hydrocarbon used primarily in cosmetics, personal care, and industrial applications. Isododecane is valued for its ability to provide a lightweight, non-greasy feel, excellent spreadability, and quick evaporation in formulations such as lotions, sunscreens, lipsticks, and hair care products. Bio-based isododecane is produced through renewable resources, such as plant oils or sugars, and undergoes a process that mimics the chemical structure of the traditional product, making it a more environmentally friendly option. By using renewable feedstocks, bio-based isododecane reduces reliance on fossil fuels and lowers the carbon footprint of the products that contain it. This eco-friendly alternative not only meets the functional performance needs of personal care products but also aligns with growing consumer demand for sustainable and bio-based ingredients in cosmetics and other consumer goods.

The major global manufacturers of Bio-based Isododecane include Global Bioenergies,
