Research Summary

Blood pressure monitors are medical devices that are used to measure and monitor blood pressure levels in individuals. These devices are typically used by healthcare professionals such as doctors, nurses, and paramedics to diagnose potential health issues, as well as by individuals who need to monitor their blood pressure regularly due to pre-existing medical conditions such as hypertension or diabetes. Blood pressure monitors use either an inflatable cuff that is wrapped around the upper arm or wrist, or a finger cuff that is placed on the finger, to measure the force of blood against the walls of the arteries as blood flows through the body. The readings are then displayed on a digital screen, indicating the systolic (top number) and diastolic (bottom number) pressures in millimeters of mercury (mmHg).

The major global manufacturers of Blood Pressure Monitors include Omron, AandD Medical, Yuwell, Andon, Microlife, Health and Life, Rossmax, SunTech Medical, Hill-Rom, Bosch + Sohn, Beurer, American Diagnostic, Briggs Healthcare, Medisana, Citizen, etc. The global players competition landscape in this report is divided into three
