### Research Summary

Borosilicate glass tubes are cylindrical glass structures made from borosilicate glass. Borosilicate glass is a type of glass that contains boron trioxide, which imparts excellent thermal and chemical resistance to the material. Borosilicate glass tubes are known for their low coefficient of thermal expansion, making them highly resistant to thermal shock and able to withstand rapid temperature changes without breaking. This property makes them ideal for various applications, including laboratory equipment, industrial processes, and scientific experiments. Borosilicate glass tubes are commonly used in the production of glassware such as test tubes, pipettes, and culture tubes, as well as in the manufacturing of heat-resistant glass products like lighting fixtures and kitchenware. They offer high clarity, durability, and resistance to chemical corrosion, making them a preferred choice in environments where accuracy, reliability, and safety are crucial.

The major global manufacturers of Borosilicate Glass Tubes include Schott, Corning, Kavalier, Duran, De Dietrich, NEG, Hilgenberg GmbH, JSG, Borosil, Northstar Glassworks, Asahi Glass, Linuo, Micoe, Yaohui Group, Tianxu, Haoji, Sichuang Shubo,
