Research Summary

Brik shape aseptic packaging refers to a specific type of packaging commonly used for the storage and transportation of liquid products, such as beverages, dairy products, and sauces. It is characterized by its unique rectangular prism shape, which provides stability and stackability. Brik shape aseptic packaging is designed to maintain the quality and safety of the contents by utilizing aseptic technology. This technology involves sterilizing both the packaging material and the product separately, and then filling the sterile product into the pre-sterilized packaging in a controlled environment. The packaging material typically consists of multiple layers, including a combination of paperboard, plastic, and aluminum foil, which act as a barrier against light, oxygen, and external contaminants. This ensures a longer shelf life for the product without the need for refrigeration or preservatives. Brik shape aseptic packaging offers convenience, ease of use, and reduced environmental impact due to its efficient use of materials and its recyclability. It has become a popular choice in the food and beverage industry, providing a safe and convenient way to package and distribute liquid products while maintaining their freshness and quality.

The major global manufacturers of Brik Shape Aseptic Packaging include Tetra Pak, SIG, Elopak, Greatview, Xinjufeng Pack, Bihai, Lamipack, Coesia IPI, Likang, ipack, Skylong, Jielong Yongfa, etc. The global players competition landscape in this report is divided into three tiers.
