Research Summary

Broadband CPE (Customer Premises Equipment) refers to the devices and equipment installed at the customer's location to enable and utilize broadband internet services. It acts as a bridge between the service provider's network and the customer's devices, facilitating the connection and communication between them. Broadband CPE can include various devices such as modems, routers, gateways, or network interface devices. Modems are responsible for converting the broadband signal from the service provider into a format that can be used by the customer's devices, allowing them to access the internet.
