### Research Summary

Bulletproof security glass, also known as ballistic or bullet-resistant glass, is a specialized type of glass designed to withstand the impact of bullets or other high-velocity projectiles. It is constructed using multiple layers of glass and polycarbonate or acrylic interlayers, which are laminated together under heat and pressure. The combination of glass and interlayers provides high levels of resistance against ballistic threats, preventing the glass from shattering or allowing projectiles to penetrate. Depending on the desired level of protection, the number and thickness of the glass and interlayer layers can be adjusted. Bulletproof security glass offers enhanced safety in applications where protection against gunfire or forced entry is necessary, such as banks, government buildings, embassies, jewelry stores, and high-security facilities. It provides a transparent and visually appealing solution while providing a strong deterrent against potential threats.

The major global manufacturers of Bulletproof Security Glass include Asahi Glass, NSG, Saint-Gobain, Guardian, CSG Holding, Sisecam, Fuyao Group, Taiwan glass,
