### Research Summary

Cable laying vessels are specially designed ships used for the installation and maintenance of undersea cables. These vessels are equipped with advanced technology and specialized equipment that allows them to lay and repair submarine cables on the seafloor. Typical cable laying vessels have a large deck area to store and load cables, a dynamic positioning system that keeps the vessel in place during cable installation, an ROV (Remotely Operated Vehicle) for cable inspection and maintenance, and a cable handling system. They can also have specialized tools such as ploughs to bury cables deep in the seabed. Cable laying vessels are used in the telecommunications industry, offshore energy industry, and other sectors that require undersea cable installations.

The major global manufacturers of Cable Laying Vessels include Fincantieri, Kleven, Royal IHC, Ulstein Verft, Damen Shipyards, Colombo Dockyard, Kanrei Shipbuilding, Fujian Mawei, CSSC, Shunzheng Shipyard, etc. The global players competition landscape in this report is divided into three tiers.
