### Research Summary

Calcium silicate insulation materials are lightweight, high-performance insulating materials made primarily from calcium silicate, silica, and reinforcing fibers. They are widely used in industrial and commercial applications to provide thermal insulation for high-temperature equipment, such as pipes, boilers, and furnaces, due to their excellent heat resistance, low thermal conductivity, and durability. These materials are non-combustible, resistant to moisture, and exhibit dimensional stability under varying conditions, making them ideal for environments with high thermal and mechanical stress. Additionally, calcium silicate insulation is valued for its ease of installation, long service life, and environmental safety, as it is free from asbestos and other hazardous substances.

The major global manufacturers of Calcium Silicate Insulation Materials include Etex Group, A&A Material, Nichias, Wellpool, Johns Manville, Ramco Hilux, Taisyou, Jinqiang, Zhejiang Aske Building Materials Technology, Guangdong Neuelement,
