Research Summary

Capsaicin is a natural compound found in chili peppers, specifically in the membranes that hold the seeds. It is responsible for the hot and spicy sensation associated with consuming spicy foods. Capsaicin is classified as a capsaicinoid and belongs to a family of chemicals known as vanilloids. When capsaicin comes into contact with the skin or mucous membranes, it stimulates the heat and pain receptors, causing a burning or tingling sensation. It is commonly used in various applications, including culinary spices, topical pain relief creams, and even in pepper sprays for self-defense. Capsaicin has been studied for its potential health benefits, including its analgesic properties, anti-inflammatory effects, and potential for weight management. However, it is important to note that capsaicin can be irritating to some individuals, and caution should be exercised when using products containing capsaicin.

The major global manufacturers of Capsaicin include Yunnan Honglv, Tianjin Shennong, Henan Bis-biotech, Great Forest Biomedical, Synthite Industries, Chenguang Biotech Group, Naturite Agro Products, Papparika Oleo's, AOS Products, Alps Pharmaceutical, etc. The global players competition landscape in this report is
