### Research Summary

A car polisher, also known as a buffer or polishing machine, is a handheld power tool designed to improve the appearance and condition of a vehicle's paintwork. It is used in the process of automotive detailing to remove minor imperfections, scratches, swirl marks, and oxidation from the surface of the car's paint. A car polisher typically consists of a motorized unit with a spinning pad or disc that rotates at high speeds. The polishing process involves applying a suitable polishing compound or polish onto the surface of the vehicle and using the polisher to gently abrade and refine the paint, restoring its shine and smoothness.
