A car rearview mirror, commonly known as a rearview mirror, is an essential component located inside a vehicle at the front center of the windshield. It is designed to provide the driver with a clear view of the area behind the vehicle. The rearview mirror allows the driver to monitor and assess the traffic situation, including the presence of other vehicles, pedestrians, or obstacles, without having to turn their head or look directly out of the rear window. Rearview mirrors typically have a reflective surface that reflects the view from the rear of the vehicle, enabling the driver to maintain situational awareness and make informed decisions while driving. Some rearview mirrors also incorporate additional features such as auto-dimming functionality to reduce glare from the headlights of vehicles behind, compass readings, or even integrated displays for backup camera systems.
