### Research Summary

A cargo pump system is an essential component in tankers and chemical ships, designed to efficiently load, discharge, and transfer liquid cargo such as crude oil, refined products, or chemicals. It typically includes one or more pumps—centrifugal, screw, or deepwell types—installed either in the cargo tanks or the pump room, along with associated piping, valves, and control systems. These pumps generate the necessary pressure to move the cargo through pipelines to or from shore facilities, while also ensuring safety and segregation between different cargoes. The system's design emphasizes reliability, corrosion resistance, and ease of maintenance to handle a wide range of cargo types and operational conditions.

The major global manufacturers of Cargo Pump System include Framo, Swanehoj, DESMI, Shinko, Wuhan Marine Machinery Plant, Marflex, Hyowon, etc. The global players competition landscape in this report is divided into three tiers.
