### Research Summary

A children's bicycle, also known as a kids' bike or child's bike, is a small-sized bicycle specifically designed for young riders. These bicycles are tailored to suit the needs and abilities of children, typically aged between 3 and 12 years old. Children's bicycles come in various sizes, with smaller frames, shorter wheelbases, and lower standover heights to accommodate their shorter stature and ensure a comfortable and safe riding experience. They often feature training wheels to assist beginners in learning to balance and ride independently.
