### Research Summary

Coco Mono Ethanol Amide (CMEA) is a surfactant and a type of nonionic detergent derived from coconut oil. It is commonly used in the production of various personal care and household products, including shampoos, conditioners, liquid soaps, and cleaning agents. CMEA acts as a foaming agent and thickener, improving the texture and stability of products. Its unique properties make it an effective emulsifier, allowing oil and water to mix together. In personal care products, CMEA contributes to creating a rich lather and enhancing the cleansing properties. In household cleaning agents, it helps to remove dirt and grease from surfaces. CMEA is considered safe for use in cosmetics and cleaning products when used at appropriate concentrations and following safety guidelines.
