### Research Summary

Cocoa grindings refer to the process of grinding cocoa beans into a paste or powder, which is a crucial step in the production of cocoa products such as chocolate and cocoa powder. The process involves crushing roasted cocoa beans and separating the outer shell from the inner nib. The nibs are then ground into a fine paste called cocoa mass or cocoa liquor. This cocoa mass can be further processed to separate cocoa solids from cocoa butter. The cocoa solids are used to produce cocoa powder, while the cocoa butter is used in chocolate-making and various other applications. Cocoa grindings serve as an important indicator of the global cocoa demand and consumption trends, providing insights into the cocoa processing industry's health and the demand for cocoa products worldwide.
