Research Summary

Cold mix asphalt, also known as cold asphalt or cold patch, is an asphalt mixture designed to be used and applied at ambient temperatures, without the need for additional heating. Unlike traditional hot mix asphalt, which requires high temperatures for mixing and laying, cold mix asphalt is made by blending aggregates (such as crushed stone, gravel, or sand) with a binder that does not require heating, typically emulsified asphalt or cutback asphalt. The cold mix asphalt mixture remains workable at lower temperatures, making it ideal for repairing potholes, filling cracks, and patching damaged areas on roads, driveways, and other pavement surfaces. Its convenient application process allows for quick repairs and maintenance, even in colder weather conditions. Cold mix asphalt offers a cost-effective and durable solution for temporary repairs and small-scale paving projects, providing improved road safety and smooth driving surfaces.

The major global manufacturers of Cold Mix Asphalt include UNIQUE Paving Materials, K31-APS, EZ Street, RAP Management, Reliable Contracting Company, Mesa Verde Enterprises, Cold Mix Manufacturing Corp, Waller County Asphalt, All States Materials
