### Research Summary

Command and control systems (C2 systems) are advanced technologies and software used by military, emergency services, and other organizations to manage and coordinate operations and resources efficiently. These systems allow commanders to make informed decisions in real-time, by providing them with comprehensive situational awareness through data analysis, communication networks, and information sharing platforms. C2 systems help synchronize activities, allocate resources, and streamline communication among various units and personnel. They can integrate multiple sources of data, such as surveillance and reconnaissance, weather, and intelligence reports, to create a cohesive picture of the operational environment. The ultimate goal of command and control systems is to enhance command effectiveness, optimize operational efficiency, and improve mission success in complex and dynamic situations.

The major global suppliers of Command and Control Systems include Lockheed Martin, Northrop Grumman, Boeing, General Dynamics, Raytheon, L3Harris, Leonardo, Saab AB, BAE Systems, Thales Group, Airbus, Leidos, Elbit Systems, Atos, ST Engineering,
