Research Summary

Concrete sealing materials are products designed to protect and enhance the durability of concrete surfaces. These materials include sealants, coatings, and additives that are applied to the concrete to create a protective barrier against water, oil, chemicals, stains, and other damaging substances. Sealants and coatings can be either penetrating or film-forming, with penetrating products entering the pores of the concrete and chemically reacting to create a hydrophobic barrier, while film-forming materials create a protective film on the surface. Some common types of concrete sealing materials include acrylic sealers, polyurethane sealers, epoxy coatings, and silicate-based sealers. These products not only protect the concrete from deterioration but can also enhance its appearance by adding gloss or color, making it an essential part of concrete maintenance for both indoor and outdoor applications.

The major global manufacturers of Concrete Sealing Materials include Bostik, ARDEX, Estop, Curecrete Distribution, Prosoco, JOTUN, BASF, SealSource, AmeriPolish, Evonik, Solomon Colors, WR Meadows, Larsen, KreteTek Industries, Kimbol Sealer,
