### Research Summary

Confined space PPE (Personal Protective Equipment) refers to specialized safety gear designed to protect workers operating in confined or enclosed spaces with potential hazards such as low oxygen levels, toxic gases, engulfment risks, or limited mobility. This PPE typically includes respiratory protection (such as SCBA or air-purifying respirators), head protection (hard hats), eye and face protection (goggles or face shields), body protection (chemical-resistant suits or coveralls), hand protection (gloves suited to specific hazards), and fall protection (harnesses and lifelines). Additional equipment, such as gas detectors and communication devices, may also be used to monitor environmental conditions and ensure worker safety. Confined space PPE is essential in industries like construction, mining, utilities, and manufacturing, where workers must operate in tanks, tunnels, sewers, and other restricted environments with potential health and safety risks.

The major global manufacturers of Confined Space PPE include DuPont, 3M, MSA Safety Incorporated, Ansell, Dräger, Honeywell, Delta Plus, etc. The global players
