Research Summary

A corded circular saw is a handheld power tool used in woodworking and construction for making straight cuts in various materials, particularly wood and plywood. Unlike cordless circular saws, corded circular saws are powered by electricity and require a power cord to connect to a power outlet. They consist of a circular blade with sharp teeth that rotates rapidly to cut through the material. The depth of cut can typically be adjusted, allowing for precise and controlled cutting. Corded circular saws are versatile tools used in a wide range of projects, including building framing, sheet cutting, and carpentry tasks. They are popular for their consistent power supply, making them suitable for extended use without the need to recharge batteries. However, their mobility is limited by the power cord, which requires an accessible electrical outlet. The choice between corded and cordless circular saws depends on the user's preference, job requirements, and need for continuous power supply.

The major global manufacturers of Corded Circular Saw include Bosch, Makita, Dewalt, Ryobi, Milwaukee, Skil, Ridgid, Hitachi, Rockwell, Porter Cable, Aoben, Craftsman, Dongcheng, Dayou, etc. The global players competition landscape in this report is
