### Research Summary

Correction tapes, also known as correction film or correction ribbons, are writing and typing accessories used to correct errors made in printed or written text. They are designed as an alternative to traditional correction fluids, providing a cleaner and more precise method of correcting mistakes. Correction tapes consist of a thin, white, opaque strip of film coated with a white correction material, such as white-out or white pigment. The tape is dispensed from a handheld dispenser with a wheel that applies the correction tape smoothly and evenly over the error. Once applied, the correction tape dries quickly, allowing users to write or type over the corrected area without smudging or smearing. Correction tapes are commonly used in offices, schools, and other settings where errors in printed or handwritten documents need to be fixed quickly and neatly.
