### Research Summary

Cosmetics OEM (Original Equipment Manufacturer) and ODM (Original Design Manufacturer) are two key models within the cosmetics industry. In the OEM model, a company produces cosmetic products under the brand name of another company. The OEM company manufactures the products based on the specifications provided by the brand owner, who then sells them under their brand name. On the other hand, ODM involves a manufacturer creating cosmetic formulations and products based on their own designs and specifications, which are then sold to various brands who can market them under their own labels. ODM manufacturers often offer a range of ready-made formulations and packaging options for brands to choose from, providing flexibility and cost-effectiveness. Both OEM and ODM services are popular among cosmetics brands seeking to launch new products without the need for in-house manufacturing facilities or expertise.
