Research Summary

Cyclo olefin polymer (COP) films are a type of flexible packaging material made from cyclo olefin polymers. These films are transparent, lightweight, and offer excellent barrier properties against moisture, oxygen, and gases. COP films are commonly used in the pharmaceutical, medical, and food industries for packaging products that require protection from moisture and oxygen, such as pharmaceuticals, medical devices, and sensitive food products. COP films are also known for their high clarity and heat resistance, making them suitable for applications where visibility and heat sealing are important. Additionally, COP films are chemically inert, non-toxic, and have low extractables, making them ideal for use in packaging materials that come into contact with sensitive products. Overall, COP films offer a combination of excellent barrier properties, clarity, and versatility, making them a popular choice for a wide range of packaging applications.

The major global manufacturers of Cyclo Olefin Polymer (COP) Films include Zeon Corporation, JSR Corporation, Mitsui Chemicals, Polyplastics, etc. The global players
