### Research Summary

A dental dam is a thin, flexible sheet, often made of latex or non-latex materials, used in dentistry to isolate a specific tooth or teeth during dental procedures. It is placed over the targeted area and secured with clamps or clips, creating a barrier between the treated tooth and the rest of the oral cavity. Dental dams provide a dry and sterile field, preventing saliva and contaminants from interfering with dental work and enhancing infection control. They are particularly valuable during procedures like root canals, where moisture control and isolation are crucial for successful treatment outcomes, and they aid in patient comfort and efficiency for both dental professionals and patients.

The major global manufacturers of Dental Dam include Sanctuary, Kulzer, Hu-Friedy (Cantel), Zirc Dental Products, Hedy Canada, Top Glove Corporation, COLTENE Group, Four D rubber, Elastomade Accessories, Den-Mat Holdings, etc. The global players competition landscape in this report is divided into three tiers.
