### Research Summary

Detergent grade zeolite refers to a specific type of zeolite mineral that is used as a key ingredient in laundry detergents. Zeolites are porous crystalline minerals with the ability to exchange ions, and detergent grade zeolite, typically clinoptilolite, is valued for its water-softening properties. When incorporated into laundry detergents, detergent grade zeolite acts as a water softener, capturing and exchanging calcium and magnesium ions from hard water. This prevents the minerals from interfering with the effectiveness of the detergent and helps improve the cleaning efficiency of the detergent in removing dirt and stains from fabrics during the washing process.

The major global manufacturers of Detergent Grade Zeolite include PQ Group, National Aluminium Company Limited, Chalco Shandong Advanced Material, Silkem, Huiying Chemical Industry, Gujarat Credo Mineral Industries, Grupo IQE, Anten Chemical, Manek Group (Manek Mineral), Fujian Risheng Chemical, etc. The global players competition landscape in this report is divided into three tiers.
