### Research Summary

Diquat dibromide is a chemical compound commonly used as a non-selective herbicide and desiccant in agriculture, horticulture, and aquatic management. With the chemical formula  $C_{12}H_{12}Br_2N_2$ , diquat dibromide is known for its rapid action in controlling a wide range of weeds and plant species. It disrupts photosynthesis and other vital cellular processes in plants, leading to their eventual death. Diquat dibromide is applied to foliage or directly to water bodies to control aquatic weeds and unwanted vegetation on land. Due to its non-selective nature, caution must be exercised to prevent harm to desirable plants. It's also used in industrial settings to control vegetation around power lines, railways, and other infrastructure. While effective, proper handling and adherence to safety guidelines are essential due to its toxicity to humans and aquatic organisms.

The major global manufacturers of Diquat Dibromide include Adama Agricultural Solutions, Bayer CropScience SE, Corteva Agriscience, American Vanguard Corporation, BASF SE, FMC Corporation, Syngenta International, Nufarm, Sumitomo Chemical Company, UPL, etc. The global players competition landscape in this report is divided into three tiers.
