Research Summary

Dispersants are chemical agents or additives that facilitate the even distribution and stabilization of solid particles or liquid droplets within a medium, such as a liquid or gas. Widely used in industries such as paints, coatings, oil and gas, and agriculture, dispersants help prevent clumping, settling, or agglomeration of particles, enhancing the homogeneity and flow properties of mixtures. In applications like oil spills, dispersants are utilized to break down and disperse oil slicks into smaller droplets, aiding in their natural degradation by microorganisms. Through their ability to promote effective dispersion, these compounds contribute to improved performance, application efficiency, and environmental outcomes in various contexts.

The major global manufacturers of Dispersants include Air Products & Chemicals, Altana, Arkema Group, Ashland, Basf, Clariant, Croda International, Cytec Industries, Elementis, Emerald, King Industries, Evonik Industries, Lubrizol, Rudolf, Dow Chemical, Uniqchem, etc. The global players competition landscape in this report is divided into three tiers.
