Research Summary

Disposable laparoscopic instruments are specialized medical tools designed for use in minimally invasive surgical procedures known as laparoscopy. These instruments are designed for single-use applications, enhancing infection control and reducing the risk of cross-contamination. Made from high-quality materials, disposable laparoscopic instruments include graspers, scissors, trocars, dissectors, and other devices with small profiles suitable for accessing the abdominal cavity through tiny incisions. Surgeons use these instruments to manipulate tissues, cut, cauterize, and perform various surgical tasks while visualizing the procedure through a laparoscope—a thin, illuminated camera. After use, disposable laparoscopic instruments are safely discarded, making them a convenient and sterile option for minimally invasive surgeries.

The major global manufacturers of Disposable Laparoscopic Instruments include Johnson and Johnson, Medtronic, B. Braun, BD, Applied Medical, Microline, Stryker Corporation, Mediflex, Genicon, Peters Surgical, Intergra LifeScience, Purple Surgical,
