Research Summary

Disposable laparoscopic trocars are medical devices used in minimally invasive laparoscopic surgeries to create access points, or ports, for inserting other surgical instruments into the abdominal cavity. These trocars consist of a sharp-tipped, pointed sleeve and a cannula that facilitates the entry and secure placement of laparoscopic instruments while maintaining a seal to prevent gas leakage during insufflation, which is the process of inflating the abdominal cavity with gas to create space. Designed for single-use applications, disposable laparoscopic trocars reduce the risk of infection and cross-contamination. They play a crucial role in enabling safe and precise instrument insertion, visualization, and manipulation during laparoscopic procedures, and they are discarded after use to ensure sterility and hygiene.

The major global manufacturers of Disposable Laparoscopic Trocars include Johnson & Johnson (Ethicon), Medtronic, Applied Medical, B.Braun, Conmed, Purple Surgical, Genicon, Ackermann, G T.K Medical, Optcla, Specath, Victor Medical, etc. The global players competition landscape in this report is divided into three tiers.
