Research Summary

Double edge blades, commonly known as DE blades, are fundamental components of safety razors used for traditional wet shaving. These blades are characterized by their thin, double-sided design, offering two sharp cutting edges per blade. Each side of the blade is carefully honed to ensure a precise and effective shave. These blades are inserted into safety razors, where they are held at a specific angle against the skin to cut facial hair. Double edge blades provide a classic and satisfying shaving experience, offering a close shave while minimizing irritation. Shaving with DE blades requires technique and practice, making it a preferred choice for shaving enthusiasts who appreciate the ritualistic aspect of wet shaving. The use of double edge blades also aligns with environmental concerns, as they generate less waste compared to disposable cartridge razors.
